✍️ About me

Professional game composer and up and coming game programmer – I have however created in different ways almost all my life. I search for experiences that start in meetings between people who have something to say. In a more and more stressful world, I strongly believe that these experiences can heal. So I hope we meet so we can create together!

🎓 Education

- 2024 – 2027___The Game Assembly___Higher vocational education in Stockholm – Game Programmer
